PROFESSIONAL SUMMARY

Results-driven Backend & Full-Stack Developer with **2+ years of professional experience** specializing in **Node.js, NestJS, Express.js**, **and database management (MongoDB, MySQL)**. Skilled in designing and developing scalable APIs **(REST & GraphQL)**, implementing cloud-based solutions, and delivering end-to-end backend systems. Experienced in guiding junior developers, deploying applications on **Linux servers, Digital Ocean, Cloudflare, and Netlify,** and leveraging AI-assisted coding **(Vibe Coder)** to accelerate development. Passionate about building high-quality, maintainable, and efficient software systems.

CORE SKILLS

- **Programming & Frameworks:** Node.js, Express.js, NestJS, Next.js, TypeScript, JavaScript
- **Databases/ORM:** MongoDB(Mongoose), MySQL(TypeORM), Appwrite, Supabase
- **APIs:** REST, GraphQL
- **Cloud & DevOps:** Digital Ocean, Cloudflare, Netlify, Docker, Linux server hosting
- **Tools & Utilities:** Git, GitHub, Postman, Prisma, Firebase (Push Notification, Storage, Images, Audio)
- **Other Skills:** API Design, AI-assisted Development (Vibe Coder), Team Mentorship

---

EXPERIENCE

Appunik — Jr. Software Engineer

Aug, 2023 – Present

- **Project: Cerebral AI (Meditation App) — Jr. Backend Developer (Node.js/NestJS)**

- Built backend with NestJS +MySQL.
- Implemented REST APIs, later migrated to GraphQL APIs.
- Deployed backend on Digital Ocean Linux server.
- Integrated Firebase for media storage (audio/images).

- **Project: Crooze (Health & Fitness App) — Backend Developer (Team of 2)**

  - Acted as Senior Backend Developer, guiding an intern on Node.js ecosystem and best practices.
  - Developed backend in Node.js + TypeScript + MongoDB.
  - Implemented secure media handling and sensitive-data storage using Firebase.
  - Used Firebase for media and sensitive data storage.

- **Project: ContentCraft Inspector — Full-Stack Developer (AI-Assisted "Vibe Coder")**

  - Worked as Fullstack Developer with AI-assisted development.
  - Implemented Next.js frontend with Appwrite & Supabase as backend.
  - Deployed on Netlify.

- **Project: AD Innovation (Campaign/Ad Management) — Full-Stack (AI-Assisted "Vibe Coder")**

  - Designed Next.js frontend with Node.js backend.
  - Used Cloudflare Workers, KV, and D1 DB for scalability.

Linearloop.io — Backend Developer Intern

Feb, 2023 – Jun, 2023

- Learned and practiced Node.js, Express.js, NestJS, and MongoDB.
- Built 2 hands-on projects to gain practical API development experience.
- Strengthened knowledge in API development and database management.

EDUCATION

Bachelor of Engineering (Computer Engineering)

LDRP Institute of Technology and Research, Gandhinagar — 2019 – 2023
