PROFILE INFO

Objectives to work hard with full dedication for the achievement of organization objective, hence enhancing my skills and knowledge and ready to learn new things. I am seeking employment with a company where i can use my talent and skills to grow and expand the company.

SKILLS

- **Web Development:** Node.js, NestJS, Express.js
- **Version Control Systems:** Git, GitLab, GitHub
- **Tools:** VSCode, Postman
- **Database Services :** MongoDB, MySql, Firebase
- **Server Management:** Linux Server, Docker
- AI
- **APIs:** GPT API, Gemini API with google cloud

EDUCATION

2019 - 2023

B. Tech in Computer Engineering

LDRP Institute of Technology and Research

2017 - 2019

Higher Secondary

H.S.C in Science - Devasya International Public School

EXPERIENCE

August, 2023 - PRESENT

APPUNIK | Jr. Backend Developer

- working as a backend Jr. Node.js developer and Responsible for handling database and server side code.
- Collaborated with front-end developers to ensure a smooth integration of the back-end
- code into the user interface.
- Developed REST and GraphQL APIs as per client requirements using Express.js and Nest.js.
- Team work experience for bug fixing and troubleshooting to maintain code quality.

March, 2023 - July 2023

LINEARLOOP.IO | Intern

- Joined as a Node Intern and learned about JavaScript, Typescript, Node.js, MongoDB.
- Developed strong organizational and time management skills by completing multiple tasks
- on time.
- Gained practical experience with 2 personal Projects based on Express.js and Nest.js and
- also utilizing MongoDB as a database.
- Actively Participated in code review and Bug Fixing.

PERSONAL PROJECTS

1. AI-Powered Food Analysis and Content Enhancement App

Technologies Used : GPT API, Gemini API, Nest.js, Firebase, Linux, Docker

Responsibilities:

- Developed backend using NestJS, integrating OpenAI and Gemini APIs.
- Implemented multi-modal input processing (text, audio, images, videos).
- Created APIs for enhancing prompts and analyzing food items.
- Leveraged AI models to improve user-generated content and food analysis. Integrated Firebase for storage and configuration management.
- Deployed backend on Linux server with Docker. Collaborated closely with frontend team for seamless user experience.

Achievements:

- Enhanced user engagement through improved content and nutritional analysis.
- Improved system performance through efficient backend architecture and AI model integration.

2. Meditation App Backend

Technologies Used: Nest.js, MySQL, Firebase, GraphQL APIs, Linux

Responsibilities:

- Designed and implemented GraphQL APIs for JWT authentication, user management, content categorization, session tracking, and achievements.
- Deployed application on Linux server using GitLab.
- Optimized performance with basic rate limiting and regular bug fixes.
- Integrated Firebase for media storage and Push Notifications.

Achievements:

- Contributed to scalability and performance improvements.
- Delivered functional backend system for meditation app.

3. E-Commerce Website

Technologies Used: Express.js, MongoDB

Responsibilities:

- Developed RESTful APIs for basic e-commerce functionalities.
- Implemented CRUD operations using MongoDB. Created server-side logic with Node.js and Express.js.

Achievements:

- Gained practical experience in building e-commerce backend systems.
- Improved skills in RESTful API design and NoSQL database integration.

4. Social Media App

Technologies Used: NestJS, MongoDB

Responsibilities:

- Developed RESTful APIs for user connections and social features.
- Implemented JWT Token authentication for user and admin access.
- Managed CRUD operations for user profiles and social functionalities.

Achievements:

- Successfully implemented core social media functionalities.
- Enhanced skills in secure authentication practices and NoSQL database management.
